Wildlife Management – Distance Programs

The Wildlife Management (Habitat) Programs are postgraduate coursework programs in wildlife and habitat management offered by the Graduate School of Environment (GSE). The programs have a strong interdisciplinary and practical focus and a flexible delivery method.

The school currently offers 3 postgraduate programs in wildlife management via distance mode:
- Master of Wildlife Management (Habitat)
- Postgraduate Diploma in Wildlife Management (Habitat)
- Postgraduate Certificate in Wildlife Management (Habitat)

These programs aim to produce graduates who have the desire, drive, and dedication to become actively and passionately involved in managing wildlife resources and the habitats on which they depend.

The programs are suitable for:
- government agency staff seeking to update their expertise or seeking a higher degree in wildlife and vegetation management
- students seeking future employment in government agencies or the private sector
- professionals (e.g. zoo staff and wildlife carers, vets, environmental consultants, policy and planning specialists, lawyers, economists, accountants)
- NGO staff (e.g. conservation lobbyists, Land Councils, animal welfare groups, community groups) seeking improved understanding of wildlife and vegetation management issues

Resources and Support for Distance Students

There is a high level of support for distance students. Academic staff are available by email, fax, and telephone.

The Student Services staff deal with administrative and practical need of distance students, and students have access to a wide range of resources.

Graduating students are welcome to attend their graduation ceremony in Sydney. For students who cannot attend, degrees are conferred at the ceremony in absentia. Degrees and transcripts are sent to students by registered mail.
