

Macquarie University, Sydney, Australia

2010 Undergraduate Programs

Macquarie University has recently completed a review and renewal of our undergraduate curriculum. Our goal is to offer students a comprehensive learning experience that combines academic rigour, practical vocational skills and opportunities for social development. The new curriculum allows for double majors and double degrees and students are strongly encouraged to use this flexibility to broaden their interests. You will meet people who study outside your discipline area and expand your professional and social network by taking People and Planet elective courses.

| | COURSES | | Semester Intake # | Notes | Proposed Annual 2010 Fees (\$AUD) * |
