Credit for Previous Studies for TAFE Diploma in Accounting Graduates

A TAFE Diploma in Accounting allows students to complete the Bachelor of Commerce (Accounting) in two years of full-time. Holders of the Associate Diploma in Accounting receive exemptions totaling 23 credit points (all at 100 level), inclusive of ACCG100 Accounting 1A, ACCG101 Accounting 1B and COMP123 Introduction to Information Technology. The balance of the exemptions would be made up of elective units in our accounting program.

Holders of the Advanced Diploma in Accounting receive exemptions totaling 36 credit points, inclusive of 12 credit points above 100 level. In addition to the specific exemptions for the Associate Diploma, holders of the Advanced Diploma will also obtain exemptions for ACCG200 Fundamentals of Management Accounting and generally for BUSL250 Basic Business Law, subject to the results achieved in TAFE law courses. Students therefore have a broader range of electives to choose from.

An exemption for ACST101 Techniques and Elements of Finance, will be available to students who have obtained a satisfactory pass in each of the following TAFE units:

- 8672F Business Maths and Statistics
- 8672Q Financial Management Principles
- 8672ZF Financial Management Applications and Investment Analysis
